FOREWORD

This publication includes the available papers and discussions presented at the Nineteenth Annual Meeting of the Western Snow Conference at Victoria, British Columbia on April 19-20, 1951.

A paper entitled "Localized Effects Induced by Seeding Supercooled Clouds with Dry Ice and Silver Iodide" by Dr. Vincent J. Schaefer, General Electric Research Laboratory, Schenectady, New York, is included in the appendix of this report.

A paper entitled "Canadian Research in Induced Precipitation" by J. L. Orr, Secretary, Coordinating Committee on Induced Precipitation, Canadian National Research Council, Ottawa, Ontario, was presented at the Conference meeting but was not available for publication. Discussions by Lewis O. Grant, Water Resources Development Corporation, Denver, Colorado, on the general subject of Artificially Induced Precipitation were also not available for publication.

The publication of this report is made possible through dues and registration fees from individual members of the Western Snow Conference and from the following organizations who have recently contributed to the Western Snow Conference or have purchased copies of former Proceedings.
